# TODAY'S BIGGEST SHOPLIFTING PROBLEM

**Now used by all smart and  
professional shoplifters**

# Alert MetalGuard

## Shoplifting with tinfoil lined bags

The smartest way to steal a lot without risking detection  
- not even in the best anti-shoplifting systems!

### The easiest way to steal a lot

Nowadays all experienced shoplifters use *tinfoil lined bags or pockets*. It is the easiest and fastest way to steal a lot with NO risk of being detected by the anti-shoplifting systems.

Five to ten seconds and a lot of articles disappear into any kind of foil-lined cover and are taken safely out of the shop – absolutely undetected by even the best anti-shoplifting systems.

### Leaves only empty shelves or hangers

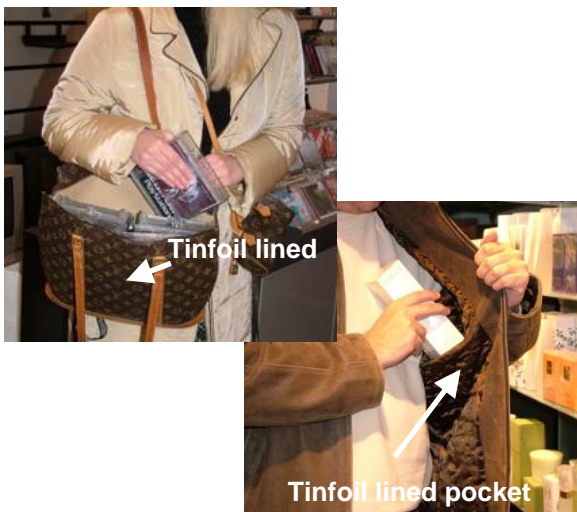

This kind of theft leaves no traces at all. No security tags with cut pins. No broken-up security frames on DVD's or PlayStation

games. Therefore this “invisible” theft is often much underestimated because it leaves no traces - only empty shelves or empty hangers.

### Anti shoplifting metal detection system

The only way to discover this very costly kind of shoplifting is to tear up bags and pockets - or much better by investing in a *good anti shoplifting metal detection system*:

### Alert MetalGuard - world leader in anti-shoplifting metal detection

The classic boosterbag

## Alert MetalGuard can stop it

Alert Metal Guard - High detection and strong deterrence  
- elegant and discreet design!

### Experience has proved

- that alone the installation of a good and VISIBLE anti-shoplifting metal detection system can reduce tin foil shoplifting dramatically.

The smart shoplifters will go elsewhere.  
The rest will be detected in the Alert Metal Guard system!

## No Sound Alarms: No Stress!

**alert METALGUARD** has electronic settings in order to reduce or eliminate completely detection of irrelevant metal items. In spite of that even the world's best metal detection system will detect some irrelevant and fully legal metal items. Therefore a sound alarm might create stress among both customers and employees. To solve this problem **alert METALGUARD** offers 2 good solutions:

- a simple inexpensive but effective **Strobe light** for instance to be placed under the cash desk
- or a specially developed **Quick Pager system** transmitting soundless alarms from the metal detection system to a smart receiver in the pocket of the shop manager or security people.

These silent alarms allow also discreet shadowing of suspect persons - and makes it impossible for smart shoplifters to test the system with "innocent" metal items.

Strobe light

Quick pager
